# Forward Looking Statements

TRIUMPH GOLD

Certain of the statements contained in this presentation, including, without limitation, statements regarding the anticipated content, commencement and cost of exploration programs, anticipated exploration program results, the discovery and delineation of mineral deposits/resources/reserves, the anticipated preparation and timing of an updated 43-101 resource estimate, the potential for a significant expansion of the resource, the economic outlook for the gold mining industry, Triumph Gold's (the Company) expectations regarding gold prices and production, and its future liquidity and capital resources and planned expenditures, are forward-looking statements. Information concerning mineral resource estimates may also be deemed to constitute forward-looking statements in that these statements reflect predictions of mineralization that would be encountered if a mineral deposit were to be developed and mined. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct.

Accordingly, the Company cautions that any forward-looking statements are not guarantees of future results or performance, and that actual results may differ materially from those set out in the forward-looking statements as a result of; among other factors, variations in the nature, quality and quantity of any mineral deposits that may be located, the Company's inability to obtain any necessary permits, consents or authorizations required for its activities, material adverse changes in economic and market conditions, changes in the regulatory environment and other government actions, fluctuations in commodity prices and exchange rates, the inability of the Company to raise the necessary capital for its ongoing operations, and business and operational risks normal in the mineral exploration, development and mining industries, as well as the risks and uncertainties disclosed in the Company's most recent Management Discussion and Analysis. The Management Discussion and Analysis is filed with certain provincial securities commissions in Canada, available at [www.sedar.com](http://www.sedar.com). The Company undertakes no obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after the date of this presentation or to reflect the occurrence of unanticipated events.

All subsequent written or oral forward-looking statements attributable to the Company or any person acting on its behalf are qualified by the cautionary statements herein. Marty Henning, P. Geo., Principal Geologist of Triumph Gold Corp., is the qualified person, as defined by NI 43-101, and has reviewed the technical information in this corporate presentation. Links to references are imbedded in the following slides for additional information.

For more detailed information about the Company, please see documents available from [www.sedar.com](http://www.sedar.com) or our website [www.triumphgoldcorp.com](http://www.triumphgoldcorp.com)

# First Nations Acknowledgement

TRIUMPH GOLD

*We acknowledge that we are on traditional territories in the Yukon of the many First Nations whose footsteps have marked these lands for centuries.*

# Leadership and Management Team

TRIUMPH GOLD

## **John Anderson – Interim CEO and Chairman**

- 20 years' resource sector capital marketing experience
- Strategic company growth and management

## **Brian Bower – Lead Director**

- 30 years' experience in exploration and mining
- Key member in project development: New Afton, Kemess South, Blackwater, Mount Milligan Mines and Casino

## **Marty Henning, P.Geo – Principal Geologist**

- 15+ years' mineral exploration and mining experience
- Focused on construction, production and exploration at the New Afton block cave mine

## **Graeme Hopkins – Chief Technical Officer**

- 20 years' Data Management and GIS experience
- Involved with the Freegold Mountain Project since 2008

## **Jesse Halle, P.Geo – VP Exploration**

- 25+ years' experience in exploration
- Advance multiple porphyry copper-gold deposits in Yukon and BC, including Casino and Copper Mountain deposits

## **Emily Halle, PMP – Project Manager**

- 15+ years' experience in exploration and project management
- Focused on porphyry copper-gold systems in British Columbia and Yukon, with additional experience in South Africa, Alaska and Eastern Canada

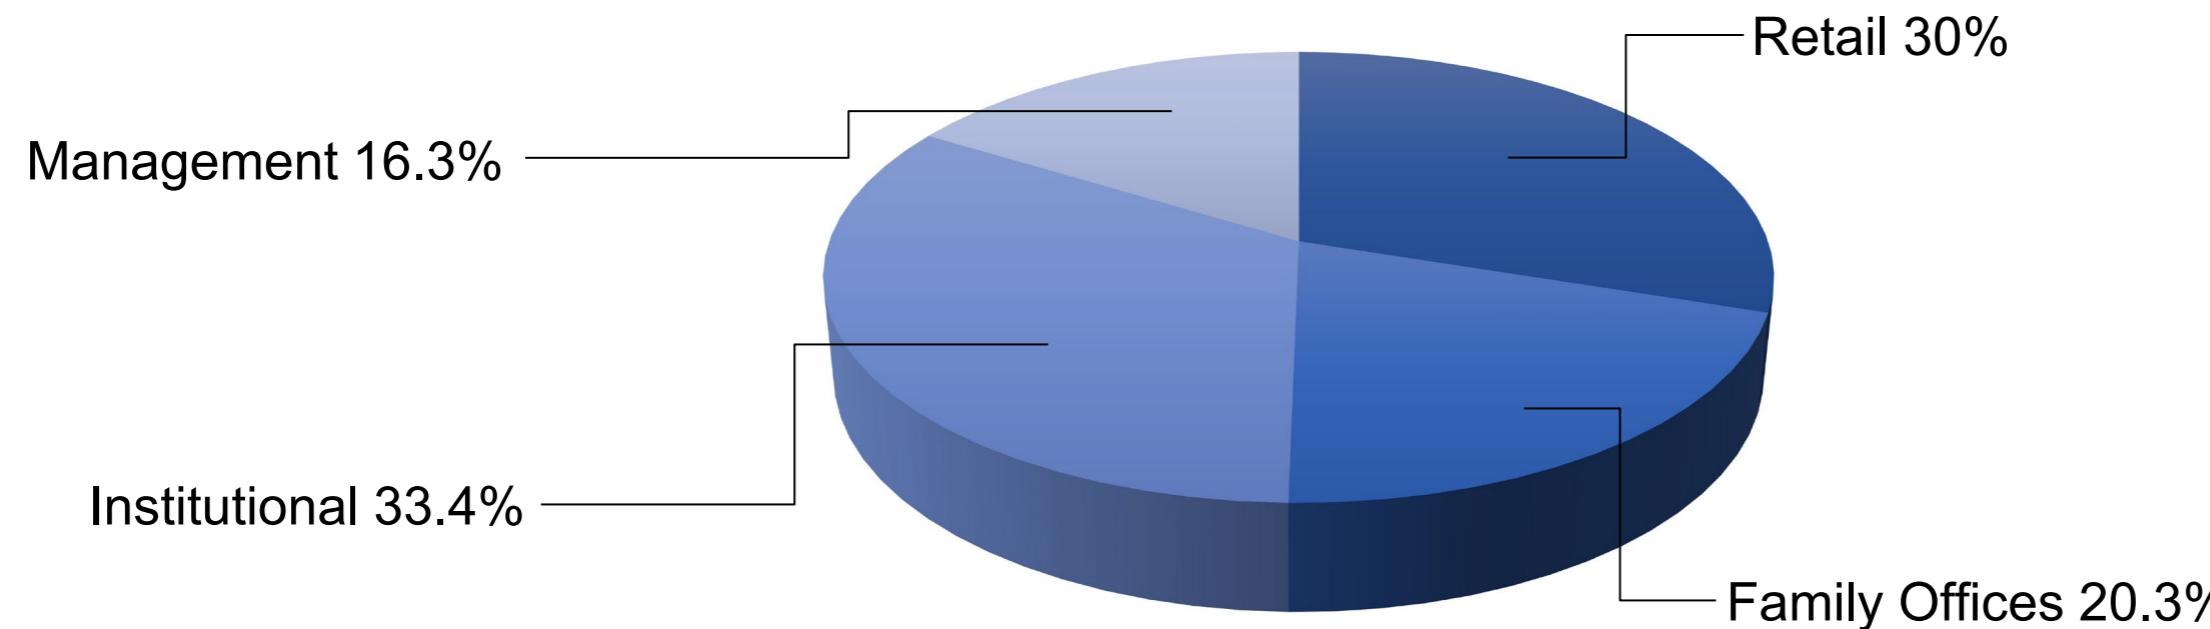

# Financial Structure

TRIUMPH GOLD

At present, the company has issued a total of 42,455,850 shares. The current stock price is 0.405 CAD per share (2023-12-08), and the total value of market capitalization is \$17.1 million CAD.

## Major shareholders:

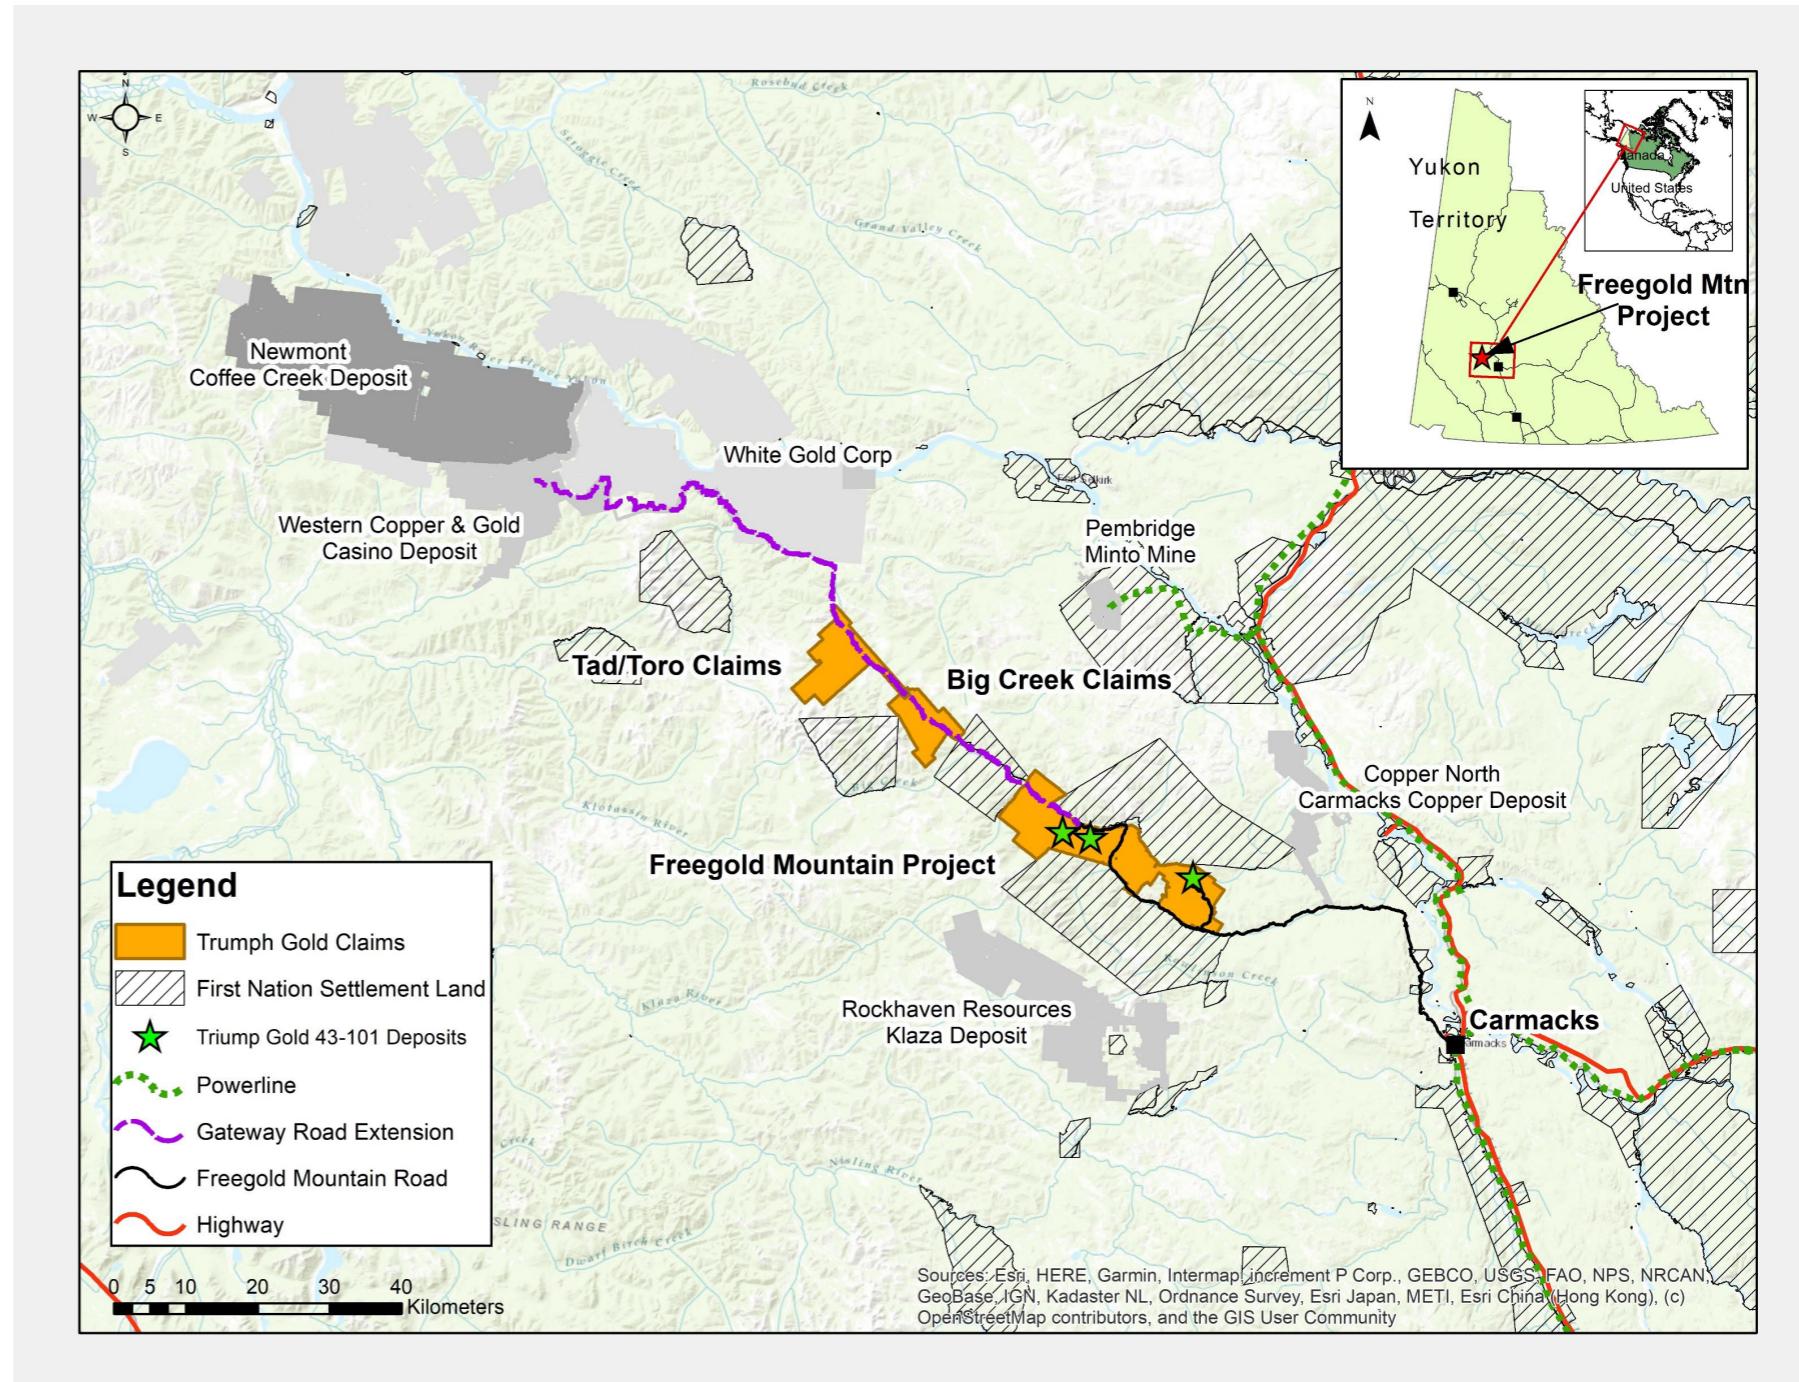

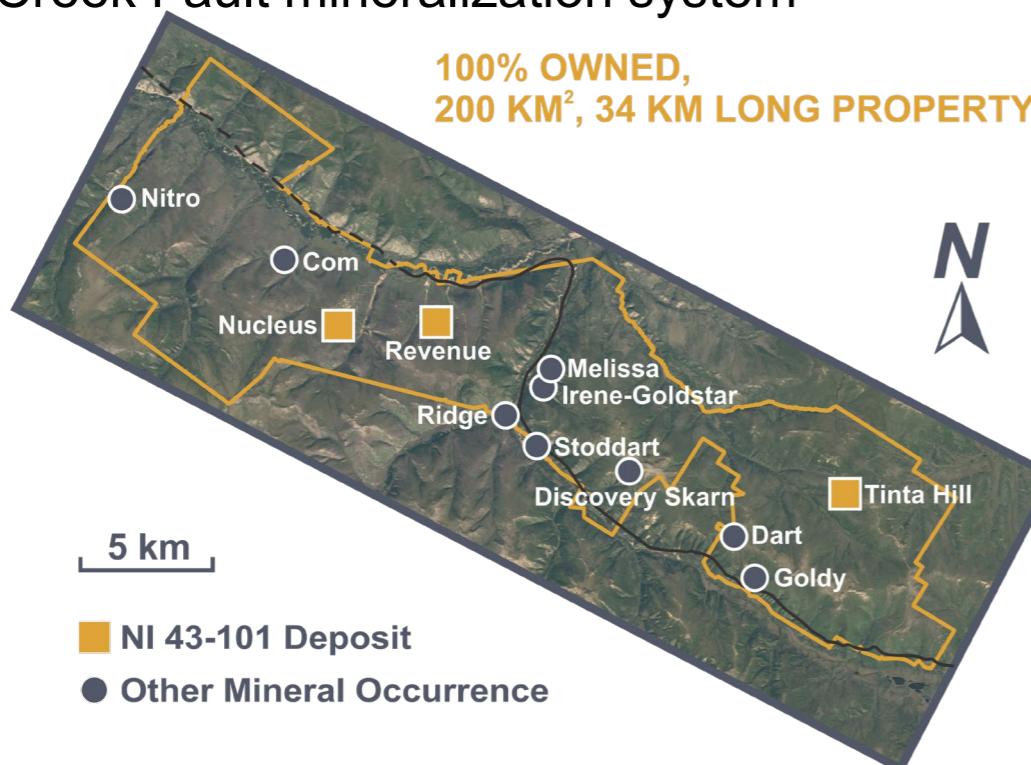

Capital Structure	
42,455,850	Issued and Outstanding
17,604,249	Warrants
870,000	Options
60,930,099	Fully Diluted

# Freegold Mountain Project Overview

TRIUMPH GOLD

**Triumph Gold** is a gold explorer focused on its 100% owned district-sized **Freegold Mountain Project**.

- The project is in the Dawson Range gold-copper belt, host to Newmont's *Coffee Deposit*, Western Copper's *Casino Deposit*, Pembridge's *Minto Mine*, Rockhaven's *Klaza Project* and Granite Creek's *Carmacks Deposit*.
- Accessible on all weather government road
- Over 20 mineralized zones identified along Triumph Gold's 34 km stretch of the prolific Big Creek Fault mineralization system

# Freegold Mountain Project Overview

TRIUMPH GOLD

## Mineralization Hosted in Every Rock Type

### Paleozoic Metamorphics (YTT) (blue)

**Lithology:** Snowcap Assemblage: mica schist/gneiss, amphibolite, quartzite, marble

**Prospects:** Nucleus, Melissa, Irene, Guder, Red Fox, Granger, Combo, Dart, Goldy, and Castle

**Mineralization:** Skarn (Au-Ag-Cu), Epithermal (Au-Ag-Cu)

### Jurassic Intrusives (orange)

**Lithology:** Quartz Monzonite to Diorite

**Prospects:** Tinta Hill, Field, and Com

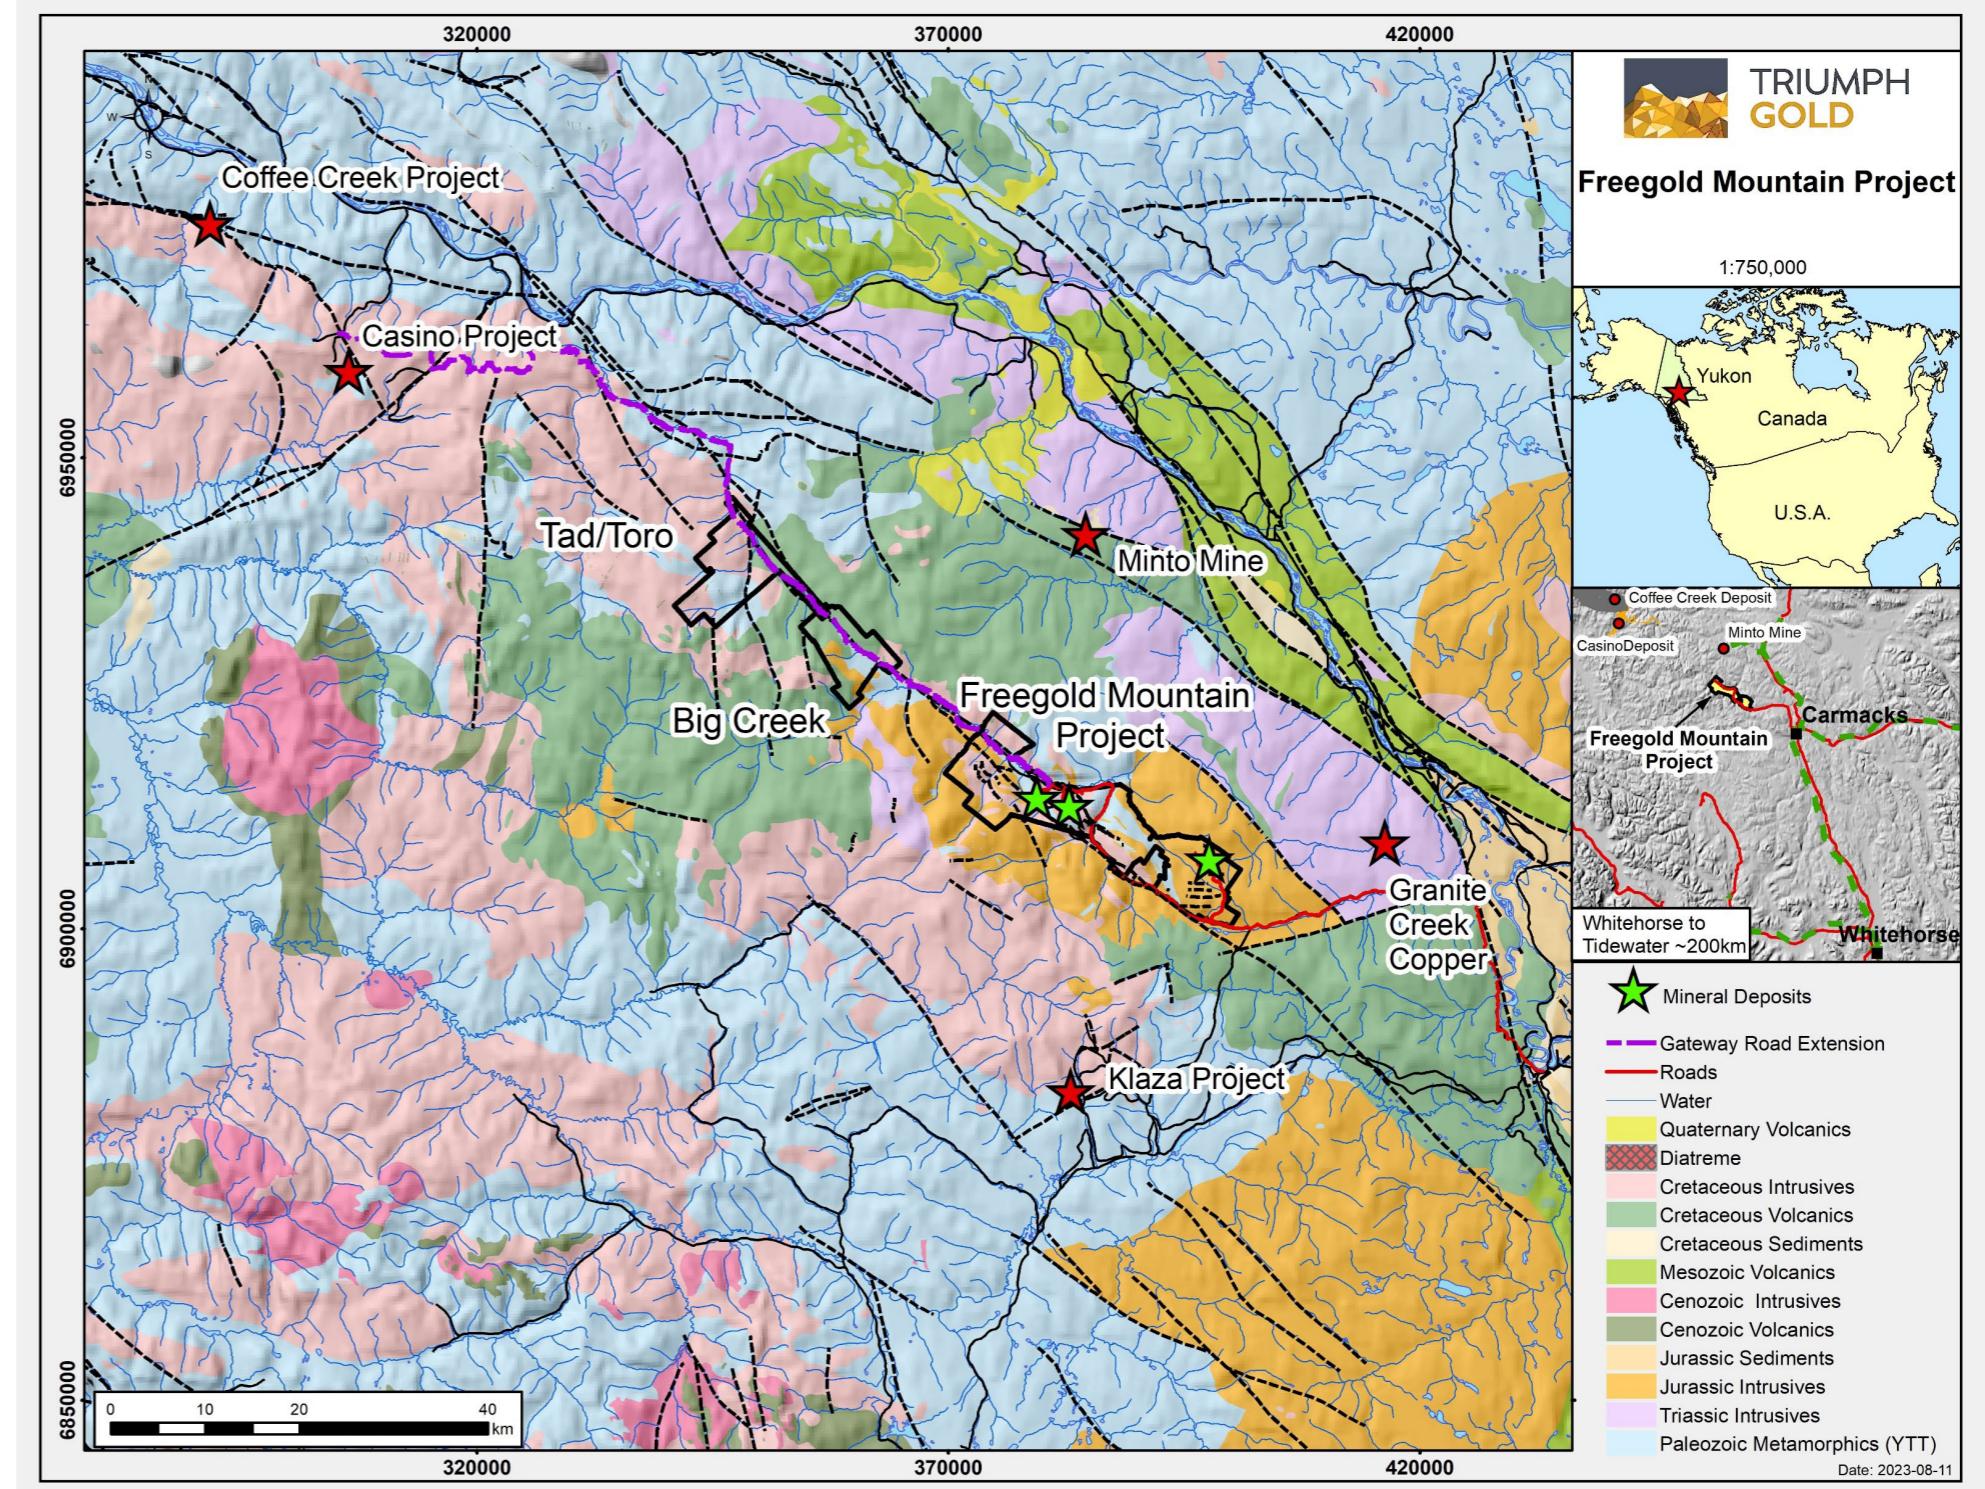

**Mineralization:** Polymetallic (Au-Ag-Pb-Zn)

### Cretaceous Intrusives (pink)

**Lithology:** Granodiorite to Leucogranite, Quartz Feldspar Porphyry

**Prospects:** Nucleus, Revenue, Granger, Stoddart, Ridge, Nitro, and Cabin

**Mineralization:** Porphyry (Au-Cu-Ag-Mo), Epithermal (Au-Ag-Cu)

# 2021 Freegold Mountain Exploration Summary

TRIUMPH GOLD

## 6,600 m of Diamond Drilling

- 3,500 m at Nucleus Targets  
Oxide Au (+/-Ag) Heap Leach Confirmation Study
- 3,100 m at Revenue (Blue Sky & WAu) Targets

## Surveying

- LIDAR Survey over Tad Toro, Big Creek and Freegold Mountain
- 6 km of Line Cutting at Tinta Hill
- Grassroots Geological Surveying

## Andalusite Peak:

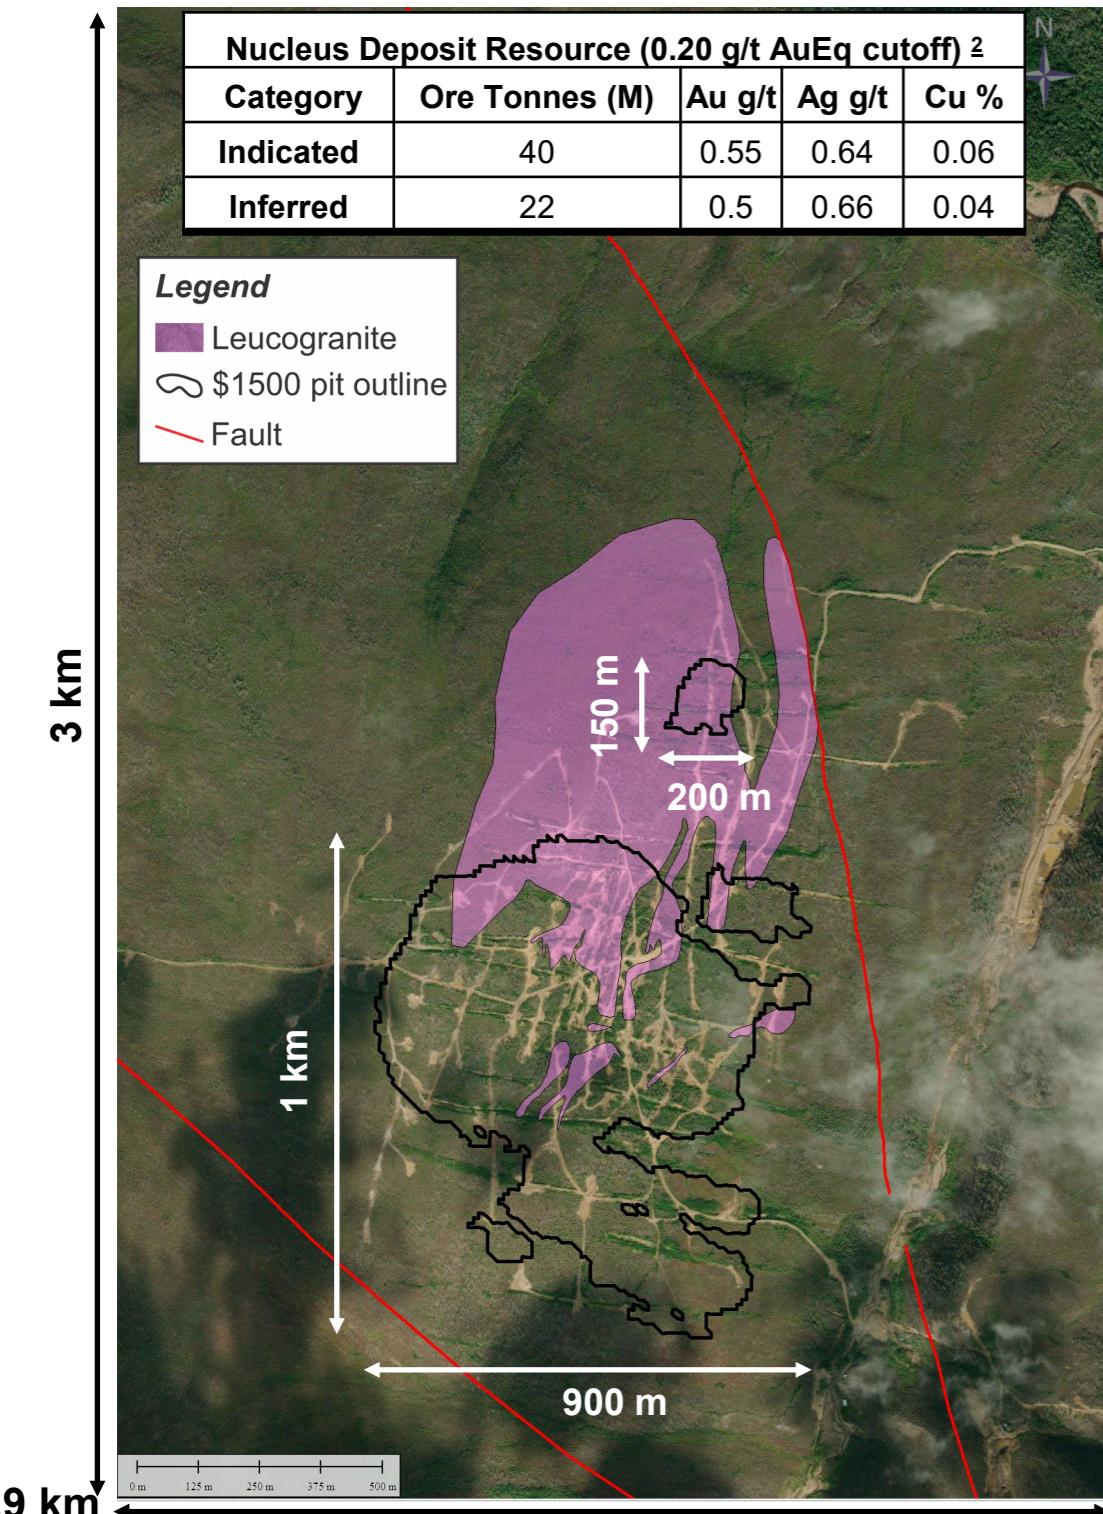

6-day prospecting / sampling field program

# Nucleus - Eagle Mine Comparison

## Bulk Tonnage Oxide Heap Leach Potential...

TRIUMPH GOLD

	Nucleus	Eagle
<b>Metres Drilled</b>	60,061	178,489
<b>Number of Holes</b>	359	1,078
<b>CN Recovery</b>	77%*	80%
<b>Number of Samples</b>	122	1,221

\*CN Recovery based on BLEG Analysis

### Summary

- Deposits are ~200 km apart
- Gold hosted in Metasediments and Felsic Intrusions
  - Intrusive-hosted gold
  - Granodiorite at Eagle
  - Leucogranite at Nucleus
- Similar gold grades and recoveries
  - 1/10<sup>th</sup> number of CN samples at Nucleus
- Nucleus is ~1/3 the size of Eagle with 1/3 the amount of drilling
- Average drill hole spacing
  - Eagle Main = 30 m
  - Nucleus = 50-100 m

Eagle Gold Mine Resource (0.15 g/t Au cutoff) <sup>1</sup>		
Category	Ore Tonnes (M)	Au g/t
Measured & Indicated	217	0.63
Inferred	22	0.52

2021 Exploration Program assayed for AuCN Recovery, additional opportunity analyzing historic pulps

# 2021 Nucleus Drilling: North, Main, Big Creek South and Orbit

TRIUMPH GOLD

## 2021 Nucleus Exploration Summary – 3,565 m (12 holes)

**Main Resource (N21-01, N21-02, N21-04, N21-06, N21-07, N21-10)**

- 1,938 m diamond drilling, (6 holes)
- Testing the “Four Corners” of the resource
- 2 holes stepping out ~300 m of the southern limit of the \$1500 pit shell
- Expanded mineralization 50-100 m laterally and vertically
- Confirmed epithermal gold and skarn mineralization

**North Resource (N21-08, N21-09, N21-11)**

- 776 m diamond drilling (3 holes)
- Previous resource based on RAB drilling
- Intersected up to 150 m of oxidation vertically
- Confirmed epithermal oxide gold mineralization

**Big Creek South Fault (N21-03, N21-05)**

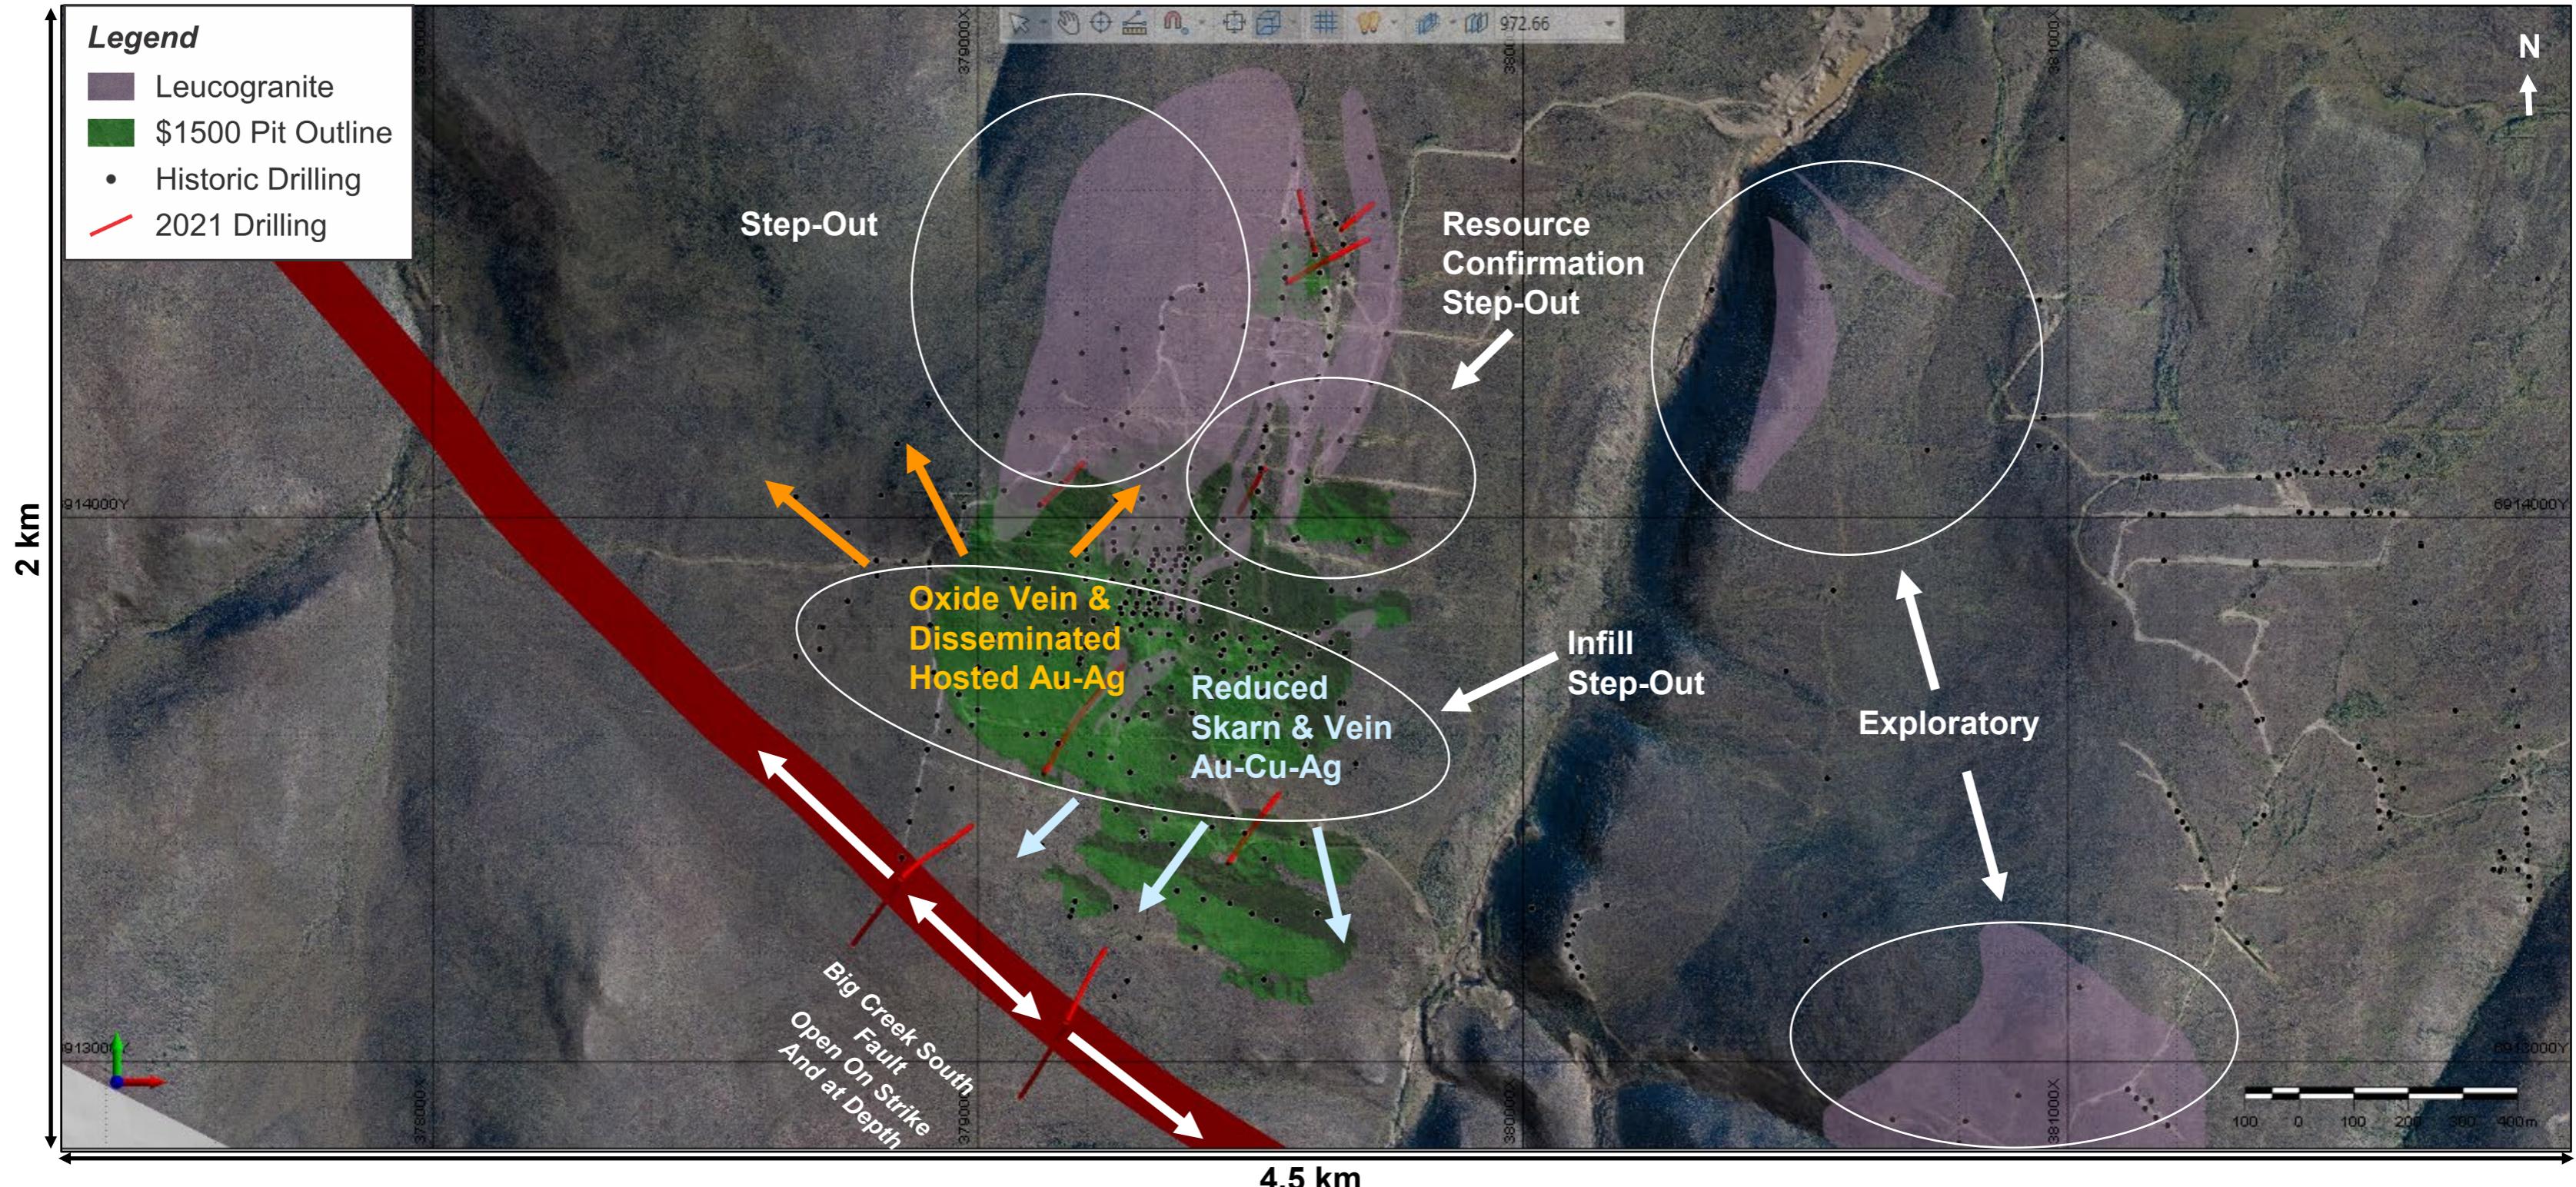

- 608 m diamond drilling (2 holes)
- Maiden holes testing geophysical anomalies
- Intersected up to 19 m of replacement-style mineralization

**Orbit (O21-01)**

- 242 m diamond drilling (1 hole)
- Maiden hole testing copper mineralization at surface
- Intersected epithermal mineralization
